Office Action Summary	Application No. 09/990,206	Applicant(s) GEHLOT, NARAYAN L.	
	Examiner Mark Hellner	Art Unit 3663	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3 and 9-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Farmer et al.

Farmer et al disclose a system for amplification of WDM signals (column 1, line 64) in the C, L S and XL bands (column 2, lines 5-15) comprising: a radio frequency modulated pump source (figure 3) and a transmission fiber (figure 2) for receiving communication signals and the RF modulated pump signal. The RF modulated pump source further comprises: an optical source (30) for generating a cw optical signal; a signal generator (32) for generating an RF signal having a frequency and modulation depth; and a modulator (31) responsive to the optical source and the signal generator.

The structure recited above reads on claims 1, 3 and 9-15.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3663

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farmer et al.

The subject matter of claim 2 is suggested to the skilled artisan by element 43 of Farmer et al.

Claims 4-6 are suggested to a person of ordinary skill in the art by the modulator defined by element 31 of Farmer et al.

Co and counter pumping was known at the time of the present application to have been applicable to Raman amplification and, as such, would have been obvious in view of the Raman pump of Farmer et al.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ackerman et al discloses RF modulation (column 8, line 31) of Raman pumps in order to suppress cross talk. The other references cited are by the author of the present application.
